

Find Your Way Through Trade

Lesson plan 2: A long way from home

Age group: 4-11

Time: 15 minutes

Objectives

To get a better understanding of where the raw materials for the products we consume daily come from.

Materials

Trade cards to print and cut (below) - laminate them for longer use! These cards make up a card game that's a variation of 'Happy Families'.

Content

8 products. Each product forms a quartet with 4 different (Southern) countries (NB these are not the only countries that produce these raw materials).

The game is played with a pack of 32 cards depicting the 8 different products and key countries of origin. All 4 players receive 6 cards; the remaining cards are placed in a stack (faced down) in the middle.

Object of the Game

The object of the game is to collect the most sets of product cards.

How to Play

This game is for four players.

The dealer shuffles the cards and deals so that every player receives six cards. The remaining cards (8) are placed in a stack in the centre of the table.

The player to the dealer's left begins.

The player asks another player for a particular product card (e.g. coffee) - but the asker must already hold at least one of the (coffee) product cards.

If the player asked has a (coffee) card then he/she must hand over that card and the player who asked gets a chance to ask another player.

If the player asked does not have a particular (coffee) product card then they answer 'No' and the turn passes to them. The previous asker takes a card from the stack in the centre of the table.

When a player has a complete product set he/she must place these sets face up in front for other players to see.

The winner is the player with the most complete product sets.
